The Wyoming BRFSS (Behavioral Risk Factor Surveillance System) is an ongoing statewide telephone survey of adults age 18 and older. The purpose of the survey is to gather information on the prevalence of health behaviors and conditions which are known to contribute to or increase the risk of chronic disease, acute illness, injury, disability and premature death. Wyoming is one of 50 states and several territories funded and supported through the National Centers for Disease Control and Prevention (CDC) to conduct BRFSS.⁹⁷

WY Behavioral Risk Factor Surveillance System Data 2001-2005

Wyoming adults reporting not having any kind of health care coverage, including health insurance, prepaid plans such as HMOs, or government plans such as Medicare.

Population Group	Percent	WY Average	95% CI	Number	Sample Size
Teton	10	17.3	7.6 - 13.1	64	690

Wyoming adults who report they do not have one or more persons they think of as their personal doctor or health care provider.

Population Group	Percent	WY Average	95% CI	Number	Sample Size
Teton	24.5	24.9	20.9 - 28.5	146	691

Wyoming adults reporting they needed to see a doctor but couldn't because of the cost at least one time in the past 12 months.

Population Group	Percent	WY Average	95% CI	Number	Sample Size
Teton	7.6	13.1	5.5 - 10.4	43	459
