

SECTION 7: TOPICS FOR FUTURE ANALYSES

The Subcommittee on Uncompensated Catastrophic and Trauma Care, upon a review of a preliminary draft of this report, has indicated the following as potential topics for future analyses of unreimbursed trauma and catastrophic care.

- Comparing trauma and catastrophic care funding per uninsured person by state.
- Estimating uncompensated out-of-county trauma care costs for Wyoming Medical Center, United Medical Center and St. John's Hospital.

Due to the limited scope of this project, these analyses are not part of this report. Additionally, they do not represent an exhaustive list of trauma and catastrophic care topics for future analyses.
